Letter of Recommendation
HORA Severe Service Valves

To whom it may concern,

We confirm that our company is a regular user of various types of HORA severe service valves listed below:

- Pressure Reducing and De-superheating Stations (e.g. Turbine Bypass Valves)
- Miscellaneous Control Valves
- Pump Protection Valves
- Steam Vent Valves

We also add that the valves performed well in operation for many years. The high quality of products, document handling and supporting organization as well as the competitive price level is for Alstom Power Turbinen GmbH a major reason to co-operation with HORA.

Best regards

ALSTOM Power Turbinen GmbH

Supply management
